

Liune

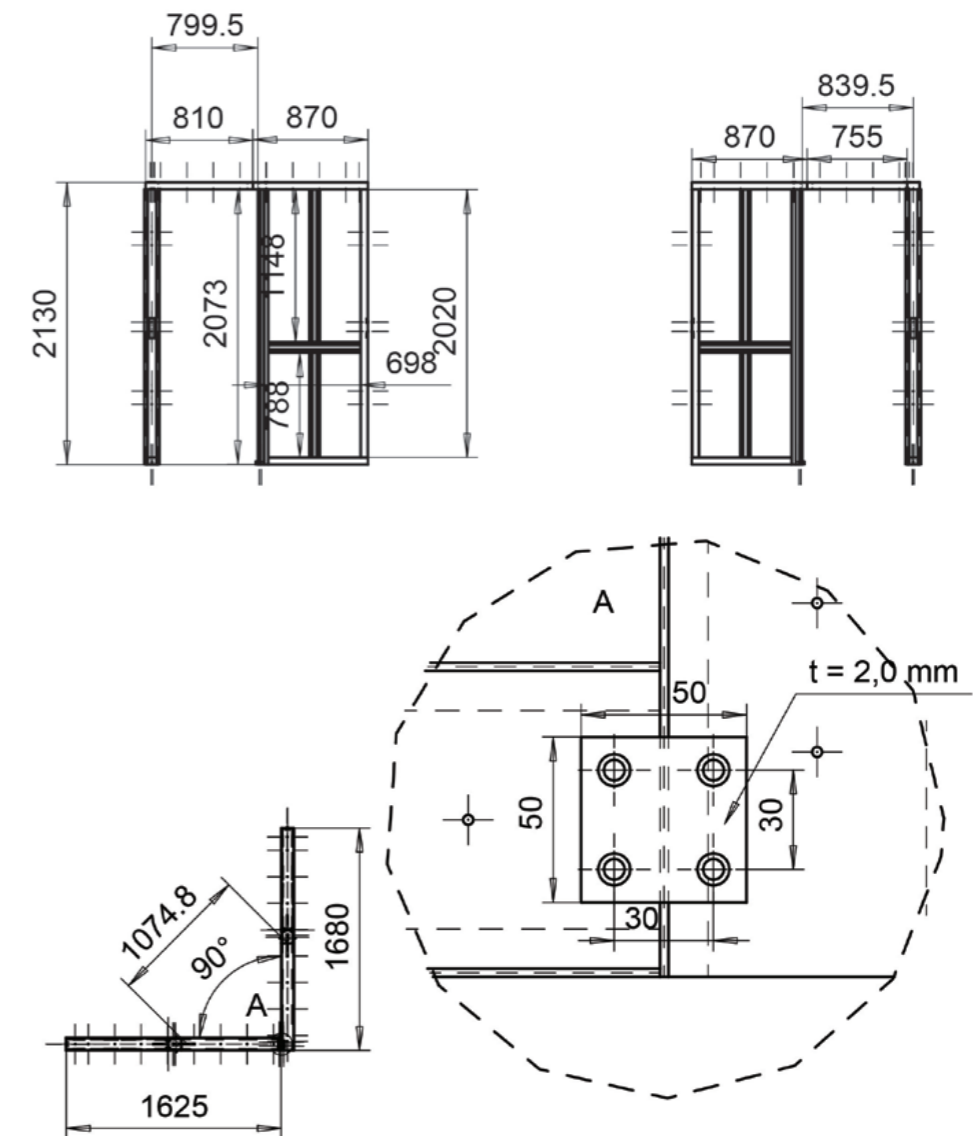

INSTALLATION INSTRUCTIONS | CORNER LIUNE

INSTALLATION

INSTALLATION

- 1 The corner Liune delivery contains 3 separate parts, which are 2 pocket elements and 1 corner piece.

The pocket elements are installed in the ready partition wall frame and attached to the wall frame from the sides, up and down (attaching from up is important for the door line not to bend down in the middle). The next step is to install the corner piece by attaching it to the pocket elements to unite them.

The corner piece is also attached to the wall structure to assure support from above. Check that the wall lines are straight and that the corner piece is straight (90 degree angle).

- 2 The pocket elements have marks to assure that the corner piece is attached correctly, follow the marks: 810 (element) = 810 (corner piece) and 755 (element) = 755 (corner piece). When this is done, continue the installation by following the instructions for double doors.
